

AACGGCGT

The image displays a DNA sequence, AACGGCGT, rendered in large, bold, sans-serif capital letters. Each letter is color-coded: 'A' is green, 'C' is blue, 'G' is orange, and 'T' is red. Below the letters, a 3D ribbon model of the DNA double helix is shown, with the ribbon color matching the letter color. The model illustrates the spatial arrangement of the bases, showing how they pair and stack to form the structure of the DNA molecule.
